FEDERAL COMMUNICATIONS COMMISSION
OFFICE OF THE SECRETARY

Dear Commissioners,

RE: Comments on PR Docket 93-38

Our family has been in the wireless communications business since 1962. Recently we entered the Private Carrier Paging market to supplement our sales and income. Very often we have felt that as a small business we are at somewhat of a disadvantage when it comes to items such as financing, access to markets and representation in industry groups.

When we heard that the FCC was studying a petition to allow individuals to use our paging service we were excited to say the least. Along with opening up retail markets to our product we feel that the increased competition among the various carriers will have a very positive benefit for the consumers of our services. This rule change would also allow our resellers to be more flexible by eliminating the burden of liability problems that might result from the improper use of our equipment. Furthermore, we feel this change would bring consistency to the FCC rules. As an SMR operator we currently can provide individuals with dispatch and telephone interconnect service but not pagers.

We hope you will rule in favor of PR Docket 93-38 as soon as possible. Thank you for your time and consideration in this matter.

Yours truly,

Dave Thomas
